For Immediate Release

Incident Commanders: Brad Donahue & Gary Sampson ICT3 Trainee

Warm Springs Fire Management

Fire Information contact: javin.dimnick@ctwsbnr.org or 541-553-2004

Warm Springs, Oregon – Current Situation: Control of the Lionshead fire is currently divided amongst 3 local units including the Warm Springs Agency, the Willamette National Forest and the Mt. Hood National Forest. On the reservation, the fire burned roughly 97,000 acres and 204,469 acres in total. Each agency will work to manage their portion of the fire in the most effective and efficient method possible while coordinating resources with nearby agencies. Hunting, woodcutting and gathering remain closed to members throughout the fires area. <https://hunting.warmsprings-nsn.gov>

Operations: Hazardous road reduction is along the north eastern perimeter in between the B-160 and B-180. 2 chippers will be arriving tomorrow to assist. There are currently dozer and grader machinery operations ongoing. Crews continue to ensure that fire is no longer active or burning along the fire perimeter. Islands or pockets of unburnt fuels well within the fire's boundaries do continue to be monitored and will put up slight columns of smoke in the days to come. Suppression work continues with long term repair assessments.

Weather: Chances of light rains today with colder temperatures Temperature highs in the low 60s in lower elevations with winds in the teens today. Fuels are not expected to ignite, and the fire is expected to maintain its current size, with minimal burning on the interior of the fire's containment lines.

Safety: All non-fire personnel should remain outside of the fire's general vicinity of the south-west quadrant of the reservation. Safety is the number one concern of everyone working on the Lionshead fire. Driving slowly, monitoring health and safe operating procedures all play an important role and are stressed in keeping everyone safe. Chipping operations are ongoing inside the fire's perimeter. Please respect marked road signs and warnings. Rock falls and falling trees create potential hazards around the fire footprint. Use caution when traveling on newly opened roads, as unmarked hazards may exist. Fire crews continue to take Covid-19 mitigation measures.
